PRESS RELEASE

BTL INTRODUCES ITS NEW BILLING SYSTEM!

Belize Telemedia Limited continues its amazing transformation. On June 12, 2017 BTL successfully implemented the First Phase of its New Billing System focusing on all PrePaid services for Mobile.

This is a significant milestone for BTL as it will allow for better flexibility and enhancements with current and new product offerings and quicker turnaround time in providing necessary customer support. Customers can also expect to see exciting new promotions. As one of the enhancements, DigiCell PrePaid Customers can now access their detailed account information as well as purchase additional products/services online and can now check prepaid data balance via our new short code *100.

"Due to the dynamic nature of the telecommunications business, we need to be able to offer subscribers near real-time charging information and innovative, flexible products along with pricing plans, with a quick time to market. With this deployment we will have a billing platform ready to support prepaid-postpaid and wireline-wireless convergence. We found this New Billing System to be one of the most flexible, robust and cost-effective solutions available on the market," said Lisa Stanford, BTL Product Management Specialist.

For more information on our new billing system, customers can go to www.digicell.bz/new-billing-system.
