

DigiNet

HITS 5,000

Over 5,000 households are now enjoying BTL's DigiNet Service, the fastest and most reliable Internet in Belize. BTL continues to bring the best and most advanced communication services to customers countrywide.

First, we revolutionized mobile with our 4G LTE advanced network. Our investment in this technology, has now ranked Belize as having the fastest mobile download speeds in the Caribbean, Central and Latin America.

Now we will repeat this success on fixed broadband with fiber-to-the-home (FTTH). After a successful DigiNet roll out in San Pedro, Ladyville and North-side Belize City, we are now continuing this roll-out in Belmopan and Orange Walk. DigiNet service will also be coming soon to Placencia and other areas of Belize City.

"Our customers love the speed and reliability of the new fiber network. DigiNet makes watching Netflix, video conferencing, gaming or listening to music more enjoyable and significantly more affordable with our bundle packages. I want to thank the BTL team for doing a phenomenal job in achieving 5,000 home installation in record time!"

BTL CEO, Rochus Schreiber

BTL's DigiNet service was launched in July of 2017 and continues to be the leader in broadband speed and quality for both residential and business customers. DigiNet is a key economic enabler that improves the competitiveness of Belizean businesses in the global connected economy, fosters the creation of new ventures and helps attract new inward investment.

BTL remains optimistic about the Belizean economic future as we aggressively deliver DigiNet fiber-to-the-home service across the country.
